

Teaching the Students

As you are probably aware the Baronscourt Surgery is involved in teaching medical and nursing students as well as training junior doctors.

Between October and May Dr George and Dr Bronte-Stewart teach 2nd year medical students the basic clinical skills. They need to learn how to take a medical history and how to examine patients. We need patients who are able and willing to help us with this.

The students come on Tuesday and Thursday afternoons. We are particularly keen to recruit patients with certain illnesses but those who are generally willing are also valuable for teaching blood pressure measurement and for the students' exam in May. The illnesses are: Asthma, COPD, Angina, peripheral vascular disease, Inflammatory bowel disease, gastric or duodenal ulcers, heartburn/reflux, prostate disease, urinary tract infections, epilepsy, multiple sclerosis, and stroke.

If you think you might be able to help with this work please complete the form below. We can cover travelling costs and are extremely grateful for help with this important work. No intimate examinations are involved.

Name

Address

Telephone Number

Please tick:

I have none of the above illnesses the students learn about but I am willing to help

If you have one of the illnesses please circle which one:

Asthma	COPD (chronic bronchitis or emphysema)	Angina
Peripheral vascular disease	Inflammatory bowel disease	Epilepsy
Gastric or duodenal ulcers	Heartburn/reflux	Prostate disease
Urinary tract infections	Multiple sclerosis	Stroke

The best afternoon for me is generally (please tick)

Tuesday

Thursday
